

IN THE CLAIMS

(1) Claim 1: (cancelled)

1 (2) Claim 2: (new) A carbon film comprising:
2 an area of insulating material surrounded by an area of conducting material; and
3 an area of material between the area of insulating material and the area of
4 conducting material having a graded dielectric constant which varies from low to high
5 from the area of insulating material to the area of conducting material.

1 (3) Claim 3: (new) The carbon film as recited in claim 2, wherein the insulating
2 material is diamond and the conducting material is amorphous or graphitic carbon.

Respectfully submitted,

WINSTEAD SECHREST & MINICK P.C.
